February 2012 – Today Gnammo S.r.l.

Senior full stack and lead developer, I designed and implemented (and manage) the entire technology stack from the beginning. The technology stack is based on:

- django and django-rest-framework for restful api for frontend and mobile apps
- django templates (html/javascript) with dynamics parts (initially jquery, now migrating to vuejs) for frontend
- postgresql for persistent storage
- amazon aws for system infrastructure

I manage the internal and external resources (graphics, other developers, mobile developers).

August 2009 – Today

Freelance Web/Android developer

Some android public games/apps:

- <https://play.google.com/store/apps/details?id=com.incredibleapp.tictactoe>
- <https://play.google.com/store/apps/details?id=com.incredibleapp.connect4inarow>
- <https://play.google.com/store/apps/details?id=com.incredibleapp.checkers>
- <https://play.google.com/store/apps/details?id=com.prysmiangroup.yes>

August 2009 – May 2012 Imille s.r.l.

Web developer and system integrator as freelance with django, mysql/postgresql

Main job: in a team of designers/accounts I develop the site <https://www.pandistelle.it> (Christmas campaigns 2009 – 2010 – 2011, Raccolta punti Copertina Scaldasogni, site renovation, “Acchiappa la Mooncake” contest – backend for mobile apps), Magazine Pan di Stelle on Facebook

Some other works

- <http://www.ngi.it>
- <http://www.piccolini.it>
- <http://www.iabforum.it/iab-forum-milano-2010/the-web-is/>
- <http://www.abetterproject.it>
- <http://www.facebook.com/pixaboymundial> (flash game about Fifa World Cup 2010)
- <http://www.ttycreo.it>
- <http://www.ilmondodipatty.it> (wordpress site)
- <http://www.somatoline.it> (drupal site)

I managed the development and the production infrastructure (mainly ubuntu lts, postgresql, mysql for python/django web sites/applications).

May 2008 – July 2009 ThunderSystems s.r.l.

I built e-commerce sites; web applications for document management, firewall, voip management; built linux-based kiosks for online gaming; control software for home automation control units.

Technology stack: python, django, postgresql, linux (debian and ubuntu).

March 2008 - April 2008 Gruppo Rizzoli/RCS

For Corriere Foundation I designed and developed an editorial management for the requests of high resolution images from the editors to the administration with j2ee and oracle.

February 2008 - March 2008 Gruppo Matrix/Alice/Telecom Italia

I implemented the logic and the user interface of the AliceMyGP Competition Prize (F1 and MotoGP), using j2ee, oracle.

October 2007 - February 2008 Gruppo Rizzoli/RCS

I realized some internal sections of the Yacht & Sail periodic website, using j2ee and oracle.

May 2007 - September 2007 I.N.P.S. (Regione Lombardia)

I implemented the transmission protocol for the pilot project for the transmission of medical certificates via the network, made for the Tuscany Region, using j2ee/websphere, mssql, oracle.
